

## How the AI Judge Scores

Every demo is evaluated across three core dimensions, weighted and blended with human judge scores for the final result.

### THE THREE PILLARS

#### Technical Execution

40%

Does it work? How well is it built? The AI evaluates implementation quality, code correctness, complexity, and how gracefully edge cases are handled.

##### WHAT EARNS TOP MARKS

Flawless, production-quality implementation that handles edge cases with elegance.

#### Innovation

30%

Is this something new? The AI looks for novel approaches at the intersection of AI and security – creative thinking that pushes boundaries.

##### WHAT EARNS TOP MARKS

A groundbreaking, never-before-seen approach that redefines what's possible.

#### Demo Quality

30%

Can you show it and explain it? The AI judges the clarity of the live demo, the strength of the explanation, and how compelling the narrative is.

##### WHAT EARNS TOP MARKS

A flawless live demo with masterful explanation and a compelling story.

## TRACK CHALLENGES

Each track adds a bonus criterion worth up to 10% of the total score.

### SHADOW::VECTOR

Attack Effectiveness

Novel attack approaches with responsible disclosure mindset

+10% bonus

### SENTINEL::MESH

Defense Robustness

Real-world defense applicability, detection accuracy, hardening

+10% bonus

### ZERO::PROOF

Privacy Guarantees

Cryptographic soundness and privacy preservation integrity

+10% bonus

### ROGUE::AGENT

Originality Factor

Ambitious exploration into uncharted territory

+10% bonus

## THE SCORING SCALE

The final score blends **70% AI judge** with **30% human judge** for a balanced, fair evaluation.
